ORDER POLICY

All orders received by Pacific Coast Garden Railway Supply are processed and filled according to the order they are received; both directly at shows, and by mail, as determined by US postmark. We make every effort to adhere to this policy. However, since these handbuilt structures take considerable time to build, we attempt to estimate the demand for certain structures of various colors and options well in advance of all orders, and inventory common parts where possible. Therefore, there are occasions when someone that placed an order after you of a different structure, color, or options, may receive their structure in advance of yours due to inventory on hand, part shortages, etc. As we increase our manufacturing capability, we are attempting to minimize such inconveniences. Please remember though, that we are more concerned with the quality of the structures that we produce than the quantity that can be built in a period of time!

Since delays may occur between placement of your order and delivery, we have defined a courtesy policy of not cashing your **undated** check until approximately two weeks prior to estimated shipping. In addition, we will call you within this two week period to confirm your shipping address and to verify that someone will be at that address to receive shipment. If these structures are a gift for someone, AND YOU WISH TO KEEP IT A SECRET, please indicate so on your order so that we do not "spill the beans!" If you order multiple structures on a single check, and we can not ship all structures at once, your check will be cashed based upon shipment of the first structure. To avoid this possibility, you may send separate checks (including taxes and shipping) for each structure if you wish.

As a part of completing the following order form, we would kindly ask for your signature below, indicating that you are familiar with our ordering policy and that it is acceptable to you.
