## Leadership Forum

Sept. 22, 2007

Dear Fellow Lions,

This year's Leadership Forum will present "Transfusion, Transition, Transformation" (TTT program).

The average Lion is now about age 57. The average number of Lions in a United States club has declined from 40 to 30. If the current rate of decline was to continue, clubs would be extinct in America within less than 20 years.

Triple T was developed over a two year period to address a realistic approach to recruiting, involving and retaining Lions at all age levels. It is an approach to interactive learning media that has been proven successful with Lions throughout the United States and Canada. In fact Lions Club International has endorsed this program and will be available through LCI soon.

The NELC has an opportunity to have PDG Harry Granger of Idaho to train us on the entire program. PDG Harry has been involved with the Triple T program from the beginning to where it is today going around the US & Canada presenting this program. Please visit the Triple TTT website at [www.lionsttt.com](http://www.lionsttt.com) to view the thumbnail videos of the program.

Program includes intro, recruitment, induction, orientation, involvement, recognition, retention, meetings, new club and public relations.

This program can be used at the club level, region, zone, district and multiple districts. It is for all Lions at every level.

Please join me in welcoming PDG Harry Granger of Idaho to New England to present a great program that would benefit us all.

Sincerely,  
PCC Ed Farrington  
President of NELC
