distance in which individuals are clustered
Dot sizes: ● = 1,000+ ● = 100 - 999 ● = 10 - 99 ◆ = 1 - 9 visits

The above map depicts: 654 visits from 28 Jan 2008 to 10 Jan 2009
This map is normally updated *daily* (latest: 2009-01-10 06:57:51 GMT)

Actual update frequency may vary: see notes below.

Running total of visits to the above URL since 28 Jan 2008: 683
Total since archive, i.e. 28 Jan 2008 - present: 683 (not necessarily all displayed - see below).
Visits on previous 'day': 2.

Additional Notes about totals and map updates (for full guide see [Map Key](#)):

The map shows individual visits to the web site shown at the top of the page, clustered within a given distance.

The location of each visit is based on the IP address of the computer used.

Update frequency variation: In order for your map to be 'updated' (whether daily, weekly, or monthly) *the number of visitors shown must also have grown by a certain percentage since the last update.* This percentage may have changed recently, and is explained more fully in our [FAQ about update frequency](#).

Total/subtotal discrepancies above are typically caused either by IP addresses not currently being in the database or by the gap between counter tallies (continuous) and map updates (which may be daily, weekly, or monthly).

See [FAQ](#) for additional explanations.
