A1 A2 A3 A4 B2 B3 B4 C2 C3 C4 D2 D3 D4

This shows how reducing the number of pitches thrown for balls, and increasing the number of strikes, can improve the Str/NP percentage.

- NP = Number of Pitches
- Bls = Balls
- Str = Strikes
- Pct = Str/NP (5/8 = 63% is the minimum goal)
 (2/3 = 67% is desirable)
 (3/4 = 75% is big league stuff)

Columns:

A1-A4 Actual numbers.

B2-B4 Results if 1/10 (10%) of A2 balls are converted to strikes.

C2-C4 " " 2/10 (20%) " " " " " " " "
 D2-D4 " " 4/10 (40%) " " " " " " " "

Other facts about balls and strikes:

- It takes 6.0 pitches to walk a batter.
- It takes 4.3 pitches to strike out a batter.
- It takes 3.1 pitches to hit a batter, or for the batter to put the ball into play.
