

## Looking for serious, high-grade .NET expertise?

*... someone affordable & dependable?*

Michael Bowman  
Solution Architect  
Software Engineer

Greetings,

My name is Michael Bowman. I'm a very capable .NET **solution architect & software engineer** that just finished a 27 month project at Boeing. My skills, attitude, and 20+ years of professional experience are top-flight and will serve your business well in a *contract capacity*. I offer full SDLC development services using Object Oriented Analysis & Design techniques coupled with various combinations of "Agile" practices to deliver quality product **on-time**. I can work on-site or off-site (based virtually in Oregon).

Besides OOAD and .NET programming, I also help companies setup and fine tune their server farms & Databases, conduct audits, improve security and establish general operational guidance packages to ensure smooth and reliable operations. My extensive network background also lends itself to computer forensics tasks when the need arises.

I would very much like to assist you and your team with your mission critical projects; *no matter what the size*. **I have excellent references.**

I'm fluent with all aspects of .NET (all framework versions and technologies) including C#, VB.NET, WPF, WCF, Workflow, Silverlight, AJAX, XML, Web Services, SQL Server, Web-Apps, Win-Form Apps, Remoting, Reflection, SOA, LINQ (Lambda), Expression Blend & Web, HTML, and a cornucopia of 3rd party tools and technologies such as JQuery, JSON, Visual Paradigm (UML), and NHibernate to name a few.

My home based computer lab is pre-equipped and configured with multiple servers & laptops. I run Visual Studio 2005/2008, SQL Server, VSS, CVS and Subversion, as well as Expression (Blend & WEB), MS Office 2007, MS Visio and MS Project; *to name a few*.

I'm a self starter that gets the job done with little guidance and supervision. My hourly rate is very reasonable and I have a very impressive track record of project success and customer satisfaction. If you are interested in my services, my resume is available on-line at the following link:

<http://resume.verticalworks.com>

I look forward to speaking with you, and helping your team achieve success with their project goals.

Thanks in advance for your time and consideration,

- Michael Bowman

Senior Engineer
