

St. Joseph Parish

Health & Help Ministry

The Health and Help Ministry of Saint Joseph's faith family is a union of nurses, service committees, parishioners and community working together to promote a better quality of life filled with God's love.

We seek to develop creative ways of addressing needs and identifying resources that promote health, wellness and healing. Working collaboratively with the Pastor and the service committees, the Health and Help Ministry emphasizes the areas of illness/injury prevention and wellness promotion, outreach, support and service.

We are comprised of nurses and allied health professionals from the parish who meet monthly to plan activities that enrich the health and spiritual well being of the parish community. Some of these activities are: community blood drives, blood pressure screenings, the Mass of Anointing and support for community programs.
